

**Screening for Appropriate Assessment (AA)
Determination under:
The Planning and Development Act 2000 (as amended)**

for:

**Proposed Material Alterations to the
Draft Cavan County Development Plan 2022-2028
(incorporating the Draft Cavan Town Local Area Plan 2022-2028)**

A Screening for Appropriate Assessment (AA) Determination is being made by Cavan County Council regarding Proposed Material Alterations to the Draft Cavan County Development Plan 2022-2028 (incorporating the Draft Cavan Town Local Area Plan 2022-2028).

Section 12 (7) (aa) of the Planning and Development Act 2000 (as amended), requires, inter alia, a determination to be made as to whether Proposed Material Alterations to the Draft Plan warrant the undertaking of AA.

The existing Draft Plan has already been informed by a Stage 2 AA and a Natura Impact Report has been prepared. As part of that AA, it was identified that the Plan may, if unmitigated, have significant effects on 37 (no.) European sites. Plan elements that could potentially affect the integrity of European sites include:

- Provisions, such as those relating to settlement, housing, sustainable communities, economic development, transport and infrastructure, environment, water and drainage, tourism, built and cultural heritage and rural development, which introduce sources for effects through construction phase such as habitat destruction, light pollution, hydrological interactions and disturbance effects;
- Loading pressures from the operational phase of developments – these sources could result in habitat loss, disturbance effects, interactions with water quality and habitat fragmentation; and
- Increasing visitors to sensitive areas during the operational phase of, for example, recreational and tourism developments.

Mitigation was integrated into the Draft Plan that allowed the Natura Impact Report to conclude that, subject to additional recommendations to be integrated into the Plan in advance of adoption, the Draft Plan is not foreseen to give rise to any significant effects on designated European sites, alone or in combination with other plans or projects¹. The Draft Plan and AA Natura Impact Report were placed on public display and submissions were invited. Some of these submissions resulted in Material Alterations being proposed to the Plan.

Taking into the measures that have been already integrated into the Draft Plan, the AA process identified that there is no potential for effects to arise on the integrity of any European site as a result of all Proposed Material Alterations, apart from Proposed Material Alteration² No. 122.

Furthermore, the AA screening process takes into account the need to undertake Stage 2 AA when mitigation is being proposed. As certain Proposed Material Alterations³ could be considered to be mitigation in relation to Plan elements that could potentially affect the integrity of European sites, further to the mitigation already integrated into the Draft Plan, the AA process identified that it would be prudent to undertake Stage 2 AA.

The undersigned, having carefully considered the information referred to above agrees with and adopts the reasoning and conclusion presented above. The undersigned hereby determines pursuant to Section 12 (7) of the Planning and Development Act 2000, as amended, and for the purposes of Article 6(3) of the Habitats Directive that Stage 2 AA is required for the above Proposed Material Alterations. The AA will be completed by 3rd March 2022.

The AA Natura Impact Report that accompanies the Proposed Material Alterations is part of the ongoing and overall AA process that is being undertaken alongside the preparation of the Plan. All Plan and AA related documentation will be considered by the planning authority in advance of the adoption of the Plan and a final AA Determination will be undertaken by the planning authority at adoption. An AA Conclusion Statement will be prepared following adoption, which will detail the AA process undertaken for the Plan.
